## 1. Concepts & Convention of Accounting :-

Accounting :- It is a system evolved to achieve a set of objectives. In order to achieve the goals, we need a set of rules or guidelines.

### Concepts of Accounting :-

- i. Business Entity Concept:- In this concept "Business is treated as separate from the proprietor. All the transactions recorded in the book of business and not in the books of proprietor.
- ii. Going Concern Concept:- This concept relates with the long life of business. The assumption is that business will continue to exist for unlimited period unless it is dissolved due to some reasons or the other.
- iii. Money Measurement Concept:- In this concept "Only those transactions are recorded in accounting which can be expressed in terms of money, those transactions which cannot be expressed in terms of money are not recorded in the books of accounting.
- iv. Dual Aspect Concept: According to this concept "Every business transaction has two aspects", one is the receiving benefit aspect another one is giving benefit aspect. Receiving is debit, giving is credit.

- v. Matching Cost Concept :- According to this concept "The expenses incurred during an accounting period, cost of those goods sold should also be charged to that period.
- vi. Realisation Concept :- According to this concept revenue is recognized when a sale is made. Sale is considered to be made at the point when the property in goods passes to the buyer and he becomes legally to pay.

### Conventions of Accounting :-

Accounting is based on some customs or usages. Nationally accountants here to adopt that usage or custom.

- i. Full Disclosure :- According to this convention accounting reports should disclose fully and fairly the information. They purpose to represent. They should be prepared honestly and sufficiently discuss honestly about the information which is of material interest to proprietors. The Companies ACT, 1956 makes it compulsory to provide all the information in the prescribed form.
- ii. Materiality :- Under this convention the trader records important factors about the commercial activities. In the form of financial statements.

if any unimportant information is to be given for the sake of clarity it will be given as footnotes.

3. Consistency :- It means the accounting method adopted should not be changed from year to year. It means that there should be consistency in the methods or principles followed Or else the results of a year.

4. Conservatism :- This Convention warns the traders not to take unrealized income into account. That is why the practice of valuing stock at cost or market price, whichever is lower is in vogue.

## 2. Capital Expenditure

- i. Capital expenditure is that amount spent on the more valuable goods or services which is used for the long duration.
- ii. We will derive the benefit from these expenditures in the current year as well as in the future years also.
- iii. Capital Expenditure has a duration of more than one year.

## Revenue Expenditure

Revenue expenditure is that amount spent on the more spent on the goods or services which is used / consumed in the short duration.
